| Date of approval | |
| Signed by Chair of Governors | |
| Signed by Head teacher | |
| Review Date | September 2025 or earlier if required. |

The 2014 National Curriculum highlights:

Aims

The national Curriculum for mathematics aims to ensure that all pupils:

- become **fluent** in the fundamentals of mathematics, including through varied and frequent practice with increasingly complex problems over time, so that pupils have conceptual understanding and are able to recall and apply their knowledge rapidly and accurately to problems.
- **reason** mathematically by following a line of enquiry, conjecturing relationships and generalisations, and developing an argument, justification or proof using mathematical language.
- can **solve problems** by applying their mathematics to a variety of routine and non-routine problems with increasing sophistication, including breaking down problems into a series of simpler steps and persevering in seeking solutions.

The expectation is that the majority of pupils will move through the programmes of study at broadly the same pace. However, decisions about when to progress should always be based on the security of pupil's understanding and their readiness to progress to the next stage. Pupils who grasp rapidly should be challenged through being offered rich and sophisticated problems before any acceleration through new content. Those who are not sufficiently fluent with earlier material, should consolidate their understanding, including through additional practice, before moving on.

Key Stage 1

The principal focus of mathematics teaching in Key Stage 1 is to ensure that pupils develop confidence and mental fluency with whole numbers, counting and place value. This should involve working with numerals, words and the four operations, including practical resources (e.g. concrete objects and measuring tools).

By the end of Year 2, pupils should know the number bonds to 20 and be precise in using and understanding place value. An emphasis on practice at this early stage will aid fluency.

Lower Key Stage 2

The principal focus of mathematics teaching in lower Key Stage 2 is to ensure that pupils become increasingly fluent with whole numbers and the four operations, including number facts and the concept of place value. This should ensure that pupils develop efficient written and mental methods and perform calculations accurately with increasingly large whole numbers.

By the end of Year 4, pupils should have memorised their multiplication tables up to and including the 12 multiplication table and show precision and fluency in their work.

Upper Key Stage 2

At this stage, pupils should develop their ability to solve a wider range of problems, including increasingly complex properties of numbers and arithmetic, and problems demanding efficient written and mental methods of calculation.

By the end of Year 6, pupils should be fluent in written methods for all four operations, including long multiplication and division, and in working with fractions, decimals and percentages.

Mental methods for ADDITION

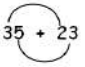

EYFS

- Story around structure - I have a set of 3 objects to start with and I get 5 more '*How many altogether?*'
- Often modelled with sets of 'things' - essentially the story follows the same plot of 'have', 'more', 'altogether'
- Lots of songs and rhymes.
- Very practical
- Using language e.g. put altogether, add altogether, total, more than

Year 1

| National Curriculum statutory | Examples | Mental strategies |
|---|---|--|
| <ul style="list-style-type: none"> • add and subtract one-digit and two-digit numbers to 20 including zero. • represent and use number bonds and related subtraction facts within 20. • pupils memorise and reason with number bonds to 10 and 20 in several forms (e.g. $9+7 = 16$, $16-7=9$; $7 = 16-9$) • they should realise the effect of adding or subtracting zero. | <p>Add two single-digit numbers e.g. $3 + 5$, $6 + \square = 9$</p> <p>Add two single-digit numbers e.g. $8 + 6$, $5 + \square = 12$</p> <p>Add a 'teens' number and ones e.g. $13 + 5$, $\square + 3 = 17$ <u>Also include:</u> Adding zero e.g. $3 + 0$, $15 + 0$, $0 + \square = 5$</p> | <ul style="list-style-type: none"> • count on in ones; • 1 more than a number; • 10 more than a multiple of 10; • add by counting on from the larger number; • reorder numbers in a calculation; • look for pairs that make 10; • look for doubles and near doubles; • begin to bridge through 10 when adding a single-digit number; • use know facts and place value to add pairs of single-digit numbers; • partition and recombine by breaking units of 7, 7 8 or 9 into '5 and a bit' • use patterns of similar calculations. |

Year 2

| National Curriculum statutory | Examples | Mental Strategies |
|--|---|---|
| <ul style="list-style-type: none"> • add and subtract numbers using concrete objects, pictorial representations, and mentally, including <ul style="list-style-type: none"> - a two digit number and ones, a two digit number and tens, two two-digit numbers - adding three one -digit numbers • recall and use addition and subtraction facts to 20 fluently, and derive and use related facts up to 100. | <p>Add three single-digit numbers e.g. $6 + 8 + 4$, $6 + 3 + 6$, $8 + 9 + 7$</p> <ul style="list-style-type: none"> • Using number bonds to 10 $3 + 6 + 4 = 6 + 4 = 10 + 3 = 13$ • Also look for doubles e.g. $4+4 = 8$ etc <p>Add a 2-digit number and ones e.g. $43 + 5$, $31 + \square = 38$</p> <p>Add a 2-digit number and tens e.g. $23 + 40$, $47 + \square = 77$</p> <p>Add pairs of 2-digit numbers e.g. $41 + 32$, $31 + \square = 54$</p> | <ul style="list-style-type: none"> • count on in tens and ones; • reorder numbers in a calculation; • add three 1 digit numbers; put the largest number first, using know facts (pairs to 10, doubles) • add by partitioning into tens and units and then recombine; <div style="text-align: center;">  $35 + 23$ $= 30 + 5 + 20 + 3$ $= 30 + 20 + 5 + 3$ $= 50 + 8$ $= 58$ </div> <ul style="list-style-type: none"> • bridge through multiples of 10; • use number facts and place value to add pairs of numbers; • add 9, 19, 11 or 21 by rounding and compensating; • use patterns of similar calculations. |

Year 3

| National Curriculum statutory | Examples | Mental Strategies |
|--|--|--|
| <ul style="list-style-type: none"> add and subtract numbers mentally, including: <ul style="list-style-type: none"> a three-digit number and ones a three-digit number and tens a three-digit number and hundreds | <p>Add a 3-digit number and ones e.g. $231 + 6$, $241 + \square = 248$</p> <p>Add a 3-digit number and tens e.g. $249 + 50$, $431 + \square = 471$</p> <p>Add a 3-digit number and hundreds e.g. $381 + 400$, $231 + \square = 531$ <u>Also include:</u> Adding pairs of 2-digit numbers e.g. $72 + 41$, $87 + \square = 121$</p> <p>Adding to any 3-digit number to make the next ten or hundred e.g. $247 + \square = 250$</p> <p>Add three small numbers e.g. $13 + 8 + 7$, $8 + 13 + 8$, $8 + 15 + 17$</p> | <ul style="list-style-type: none"> count on in hundreds, tens or ones; add mentally a 'near multiple of 10' add 3 or 4 small numbers partition into hundreds, tens and ones and in different ways, then recombine ($724 = 700 + 20 + 4$) ($724 = 600 + 110 + 14$) reorder numbers in a calculation bridge through a multiple of 10, then adjust; use known facts and place value to add; use patterns of similar calculations; use the relationship between addition and subtraction. |

Year 4

| National Curriculum statutory | Examples | Mental strategies |
|---|--|---|
| <ul style="list-style-type: none"> Pupils continue to practise mental calculation strategies ...addition and subtraction with increasingly large numbers to aid fluency. | <p>Add a 4-digit number and ones e.g. $4312 + 6$, $3441 + \square = 3443$</p> <p>Add a 4-digit number and tens e.g. $1735 + 40$, $2143 + \square = 2193$</p> <p>Add a 4-digit number and hundreds e.g. $2175 + 400$, $3248 + \square = 3948$</p> <p>Add a 4-digit number and thousands e.g. $1367 + 4000$, $5648 + \square = 7648$ <u>Also include:</u> Adding a 2-digit number to a 3-digit tens e.g. $430 + 54$, $610 + \square = 637$</p> <p>Adding any pair 3-digit numbers to a multiple of 10 e.g. $430 + 260$</p> <p>Adding to any 3 digit number make the next multiple of 1000 e.g. $370 + \square = 1000$</p> | <ul style="list-style-type: none"> count in steps of 1, 10, 100 or 1000; reorder numbers in a calculation add 3 or 4 small numbers partition, adding the most significant digit first; use known facts and place value to add; add the nearest multiple of 10 or 100 and then adjust; use the relationship between addition and subtraction. |

Year 5

| National Curriculum statutory | Examples | Mental strategies |
|--|---|--|
| <ul style="list-style-type: none"> add and subtract numbers mentally with increasingly large numbers practise mental calculations with increasingly large numbers (e.g. $12642 - 2300 = 10\ 162$) mentally add and subtract tenths, and one-digit numbers and tenths. Calculate complements to 1 ($0.83 + 0.17 = 1$) | <p>Add tenths to a 1-digit whole number and tenths e.g. $5.4 + 0.3$, $4.3 + \square = 4.9$</p> <p>Add two 1-digit whole numbers and tenths e.g. $5.4 + 2.5$, $2.4 + \square = 7.6$</p> <p><u>Also include:</u> Adding a 4-digit multiple of 100 to a 5-digit number e.g. $32\ 634 + 2100$, $18\ 521 + 7\ 100$</p> <p>Adding to a decimal fraction with units and tenths to make the next whole number e.g. $4.3 + \square = 5$</p> <p>Adding any pair of 3-digit multiples of 10 e.g. $390 + 340$, $\square + 350 = 810$</p> <p>Add two numbers with tenths and hundredths e.g. $0.57 + 0.32$, $0.48 + 0.69$</p> | <ul style="list-style-type: none"> count in steps of 0.1, 1, 10, 100 or 1000; reorder numbers in a calculation partition, adding the most significant digit first; use know facts and place value to add add the nearest multiple of 1, 10, or 100 then adjust; develop further the relationship between addition and subtraction. |

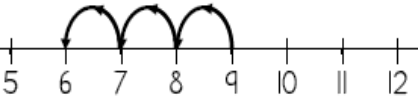

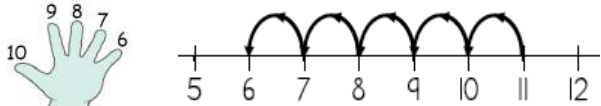

Year 6

| National Curriculum statutory | Examples | Mental strategies |
|---|---|--|
| <ul style="list-style-type: none"> They undertake mental calculations with increasingly large numbers and more complex calculations. | <p>Add large numbers e.g. $129\ 000 + 34\ 000$</p> <p>Add negative numbers in context e.g. rise from -3°C by 1°C</p> <p><u>Also include:</u> Adding several 1-digit whole numbers and tenths e.g. $2.3 + 5.7 + 3.9$</p> <p>Adding decimals with different numbers of places e.g. $0.5 + \square = 0.87$, $0.67 + 0.2$</p> <p>Adding to any number with 2 decimal places to make the next tenth or whole e.g. $3.65 + \square = 4$</p> <p>Adding any pair of 4-digit multiples of 100 e.g. $5700 + 2500$, $2400 + 8700$</p> | <ul style="list-style-type: none"> consolidate all strategies from previous years; partition, adding the most significant digit first; use known facts and place value to add add the nearest multiple of 0.1, 10, 100 or 1000, then adjust; continue to use the relationship between addition and subtraction. |

Mental methods for SUBTRACTION

EYFS

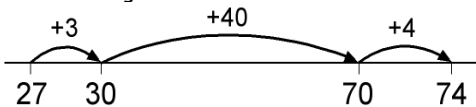

- Story around structure - I have a set of 6 objects to start with and so many of them get partitioned off, taken away, eaten, lost... *'How many are left?'*
- Often modelled with sets of 'things' - essentially the story follows the same plot of 'have', 'take away', 'have left'
- Lots of songs and rhymes.
- Very practical.
- Using language e.g. take away, distance between, difference between and less than

| | |
|---|--|
| Early skills | |
| Count out - a child finding 9 - 3, gets 9 objects and takes away 3, counts how many remain.  | |
| Count back from - a child finding 9 - 3, counts back three numbers from 9: <i>'eight, seven, six'</i> .  | |
| Count back to - a child doing 11 - 6, counts back from the first number to the second, keeping a tally using fingers of the number of numbers that have been said, <i>'ten, nine, eight, seven, six'</i> , holding up five fingers.  | |
| Count up - a child doing 11 - 6, counts up from 6 to 11, <i>'seven, eight, nine, ten, eleven'</i> , sometimes keeping a count of the spoken numbers using fingers.  | |

Year 1

| National Curriculum statutory | Examples | Mental strategies |
|---|--|---|
| <ul style="list-style-type: none"> • add and subtract one-digit and two-digit numbers to 20 including zero. • represent and use number bonds and related subtraction facts within 20. • pupils memorise and reason with number bonds to 10 and 20 in several forms (e.g. $9+7=16$, $16-7=9$; $7=16-9$) • they should realise the effect of adding or subtracting zero. | <p>Subtract a small number from a single digit number e.g. $9-2$, $8-\square=7$</p> <p>Subtract two single-digit numbers (small difference) e.g. $8-6$, $9-\square=6$</p> <p>Subtract a ones from a 'teens' number e.g. $16-5$, $\square-3=11$ Also include: Subtracting zero e.g. $3-0$, $15-0$</p> <p>Subtracting ones from 10 or 20 e.g. $10-4$, $10-\square=2$</p> | <ul style="list-style-type: none"> • count back in ones; • 1 less than a number; • 10 less than a multiple of 10; • take away a small number by counting back; • begin to bridge through 10, when subtracting a single-digit number; • use know facts and place value to subtract a single-digit number; • use patterns of similar calculations. |

Mental methods for DIVISION

| Sharing |
|---|
| <ul style="list-style-type: none"> Equal sharing occurs when a quantity is shared out equally into a given number of portions, and we work out how many there are in each portion. When we share we know how many we have to share out and how many to share between but not how many they will each get. <p>6 toy cars are shared between 2 children. How many will they have each?</p>  |
| Grouping |
| <ul style="list-style-type: none"> Grouping occurs when we are asked to find how many groups of the divisor are in the original amount. We know how many we have and how many to put into each 'set' but not the number of 'sets' we will have. <p>There are 6 cars; each child can have 2 cars. How many children will get 2 cars?</p>  |

| National Curriculum statutory | Examples |
|---|---|
| <ul style="list-style-type: none"> solve simple one-step problems involving multiplication and division, by calculating the answer using concrete objects, pictorial representations and arrays with the support of the teacher. through grouping and sharing small quantities, pupils begin to understand multiplication and division; doubling numbers and quantities, and finding simple fractions of objects, numbers and quantities make connections between arrays, number patterns, and counting in two, fives and tens. | <p>Share these pencils equally between Asif and Ben. How many pencils will each of them get?</p> <p>Put half of these ten animals in the ark. How many of the animals are in the ark?</p> <p>How many children have two squares of this chocolate?</p> <p><u>Also include:</u> Halves of corresponding doubles to 10.</p> |

Written methods for ADDITION

| | | | |
|--------|--------|--------|--------|
| Year 3 | Year 4 | Year 5 | Year 6 |
|--------|--------|--------|--------|

Add and subtract numbers with up to three digits, using formal written methods of columnar addition and subtraction.

Use place value counters to secure conceptual understanding
(Two-digits then three-digits)

↓↓↓ leading to ↓↓↓

Columnar Addition

No exchange

$$\begin{array}{r} 435 \\ + 213 \\ \hline 648 \end{array}$$

One exchange

$$\begin{array}{r} 435 \\ + 217 \\ \hline 652 \\ 1 \end{array}$$

↓↓↓ leading to ↓↓↓

Two exchanges

$$\begin{array}{r} 435 \\ + 287 \\ \hline 722 \\ 11 \end{array}$$

Also include:

$$\begin{array}{r} 679 \\ + 73 \\ \hline 752 \\ 11 \end{array} \quad \begin{array}{r} 251 \\ + 73 \\ \hline 324 \\ 1 \end{array}$$

Add and subtract numbers with up to four digits, using the formal written method of columnar addition and subtraction where appropriate.

Columnar Addition

No exchange

$$\begin{array}{r} 2351 \\ + 5413 \\ \hline 7664 \end{array}$$

One exchange

$$\begin{array}{r} 3251 \\ + 5473 \\ \hline 8724 \\ 1 \end{array}$$

Two exchanges

$$\begin{array}{r} 2938 \\ + 5423 \\ \hline 8361 \\ 11 \end{array}$$

Three exchanges

$$\begin{array}{r} 8958 \\ + 5423 \\ \hline 14381 \\ 111 \end{array}$$

Also include:

$$\begin{array}{r} 3758 \\ + 413 \\ \hline 4161 \\ 11 \end{array} \quad \begin{array}{r} 3778 \\ + 483 \\ \hline 4261 \\ 111 \end{array}$$

$$\begin{array}{r} 351 \\ 234 \\ + 423 \\ \hline 1008 \\ 1 \end{array} \quad \begin{array}{r} 355 \\ 234 \\ + 473 \\ \hline 1062 \\ 11 \end{array}$$

Decimal addition in the context of money

Add and subtract numbers with more than four digits, using the formal written methods of columnar addition and subtraction.

Formal written method

Various exchanges

$$\begin{array}{r} 37234 \\ + 75479 \\ \hline 112713 \\ 111 \end{array}$$

Also include:

$$\begin{array}{r} 2346 \\ 62 \\ 4013 \\ + 561 \\ \hline 6982 \\ 11 \end{array}$$

Decimal addition in the context of money and measures to 3 decimal places

$$\begin{array}{r} 23.15 \\ 235.63 \\ 903.09 \\ + 7.36 \\ \hline 1169.23 \\ 112 \end{array}$$

Pupil practise addition, subtraction... for larger numbers, using the efficient written methods of columnar addition and subtraction.

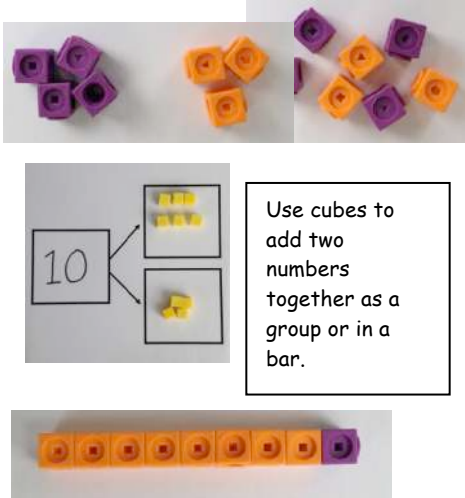

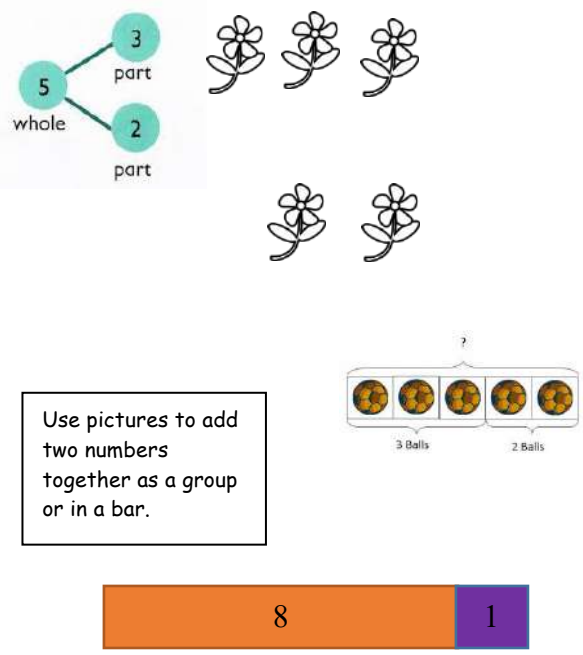

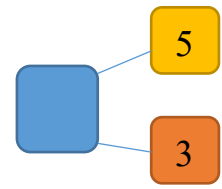

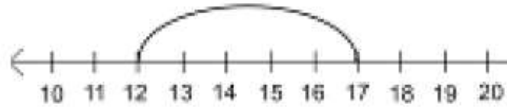

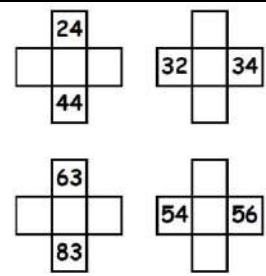

Efficient written method

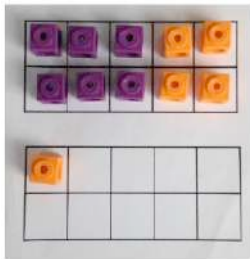

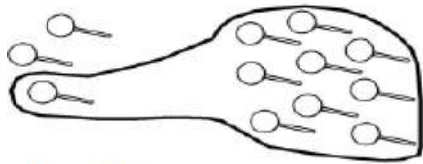

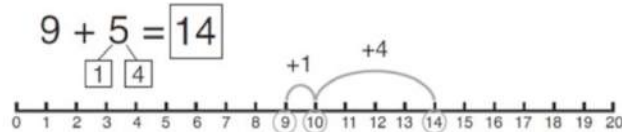

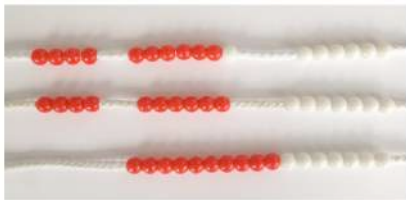

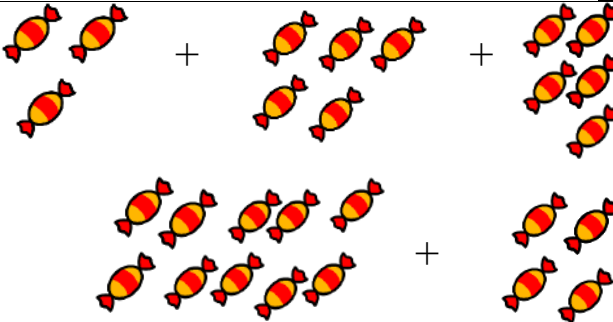

$$\begin{array}{r} 81059 \\ + 3668 \\ 15301 \\ \hline 20551 \\ 120579 \\ 1111 \end{array}$$

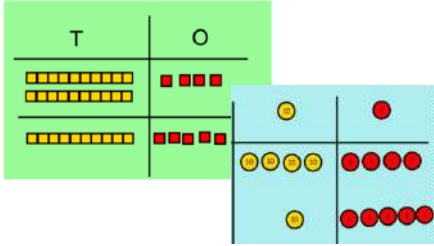

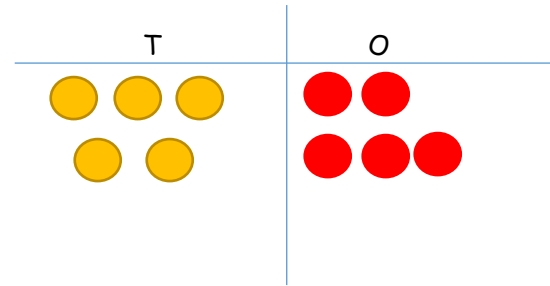

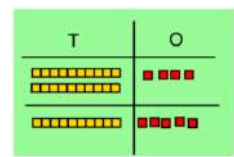

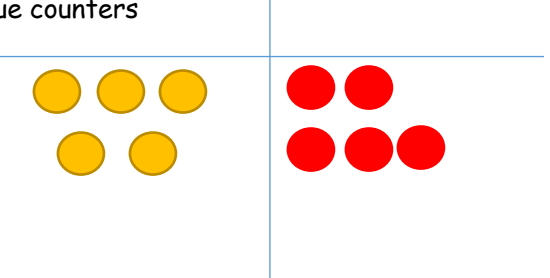

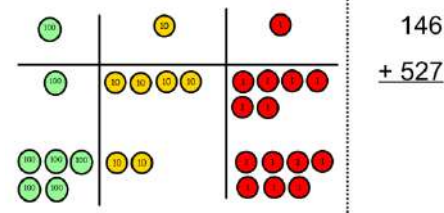

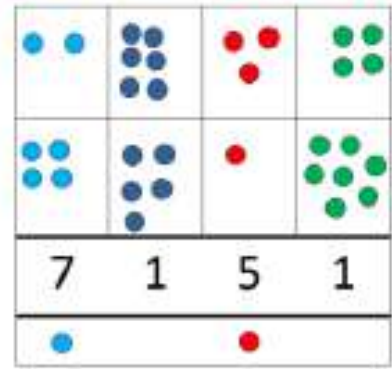

Numbers with different decimal places
e.g. $5.234 + 43.19 + 387.3$

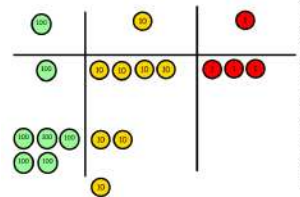

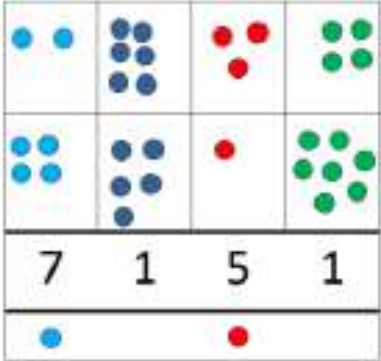

$$\begin{array}{r} 5.234 \\ 43.190 \\ + 387.300 \\ \hline 435.724 \\ 111 \end{array}$$

Progression of Addition

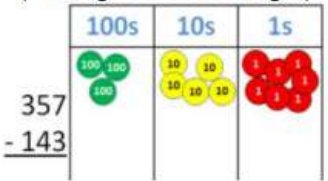

| Addition | Objective and Strategies | Concrete | Pictorial | Abstract |
|---|--|--|--|---|
| Stage 1: Concrete objects and pictorial representations. | Combining two parts to make a whole: part- whole model EYFS/Year 1 |  <div style="border: 1px solid black; padding: 5px; width: fit-content;"> Use cubes to add two numbers together as a group or in a bar. </div> |  <div style="border: 1px solid black; padding: 5px; width: fit-content;"> Use pictures to add two numbers together as a group or in a bar. </div> | $4 + 3 = 7$ $10 = 6 + 4$  <div style="border: 1px solid black; padding: 5px; width: fit-content;"> Use the part-part whole diagram as shown above to move into the abstract. </div> |
| Stage 2: Number lines and 100 squares | Starting at the bigger number and counting on EYFS/Year 1 Year 2 |  Start with the larger number on the bead string and then count on to the smaller number 1 by 1 to find the answer. | $12 + 5 = 17$  Start at the larger number on the number line and count on in ones or in one jump to find the answer. | $5 + 12 = 17$ Place the larger number in your head and count on the smaller number to find your answer. |
| | Using a 100 square - adding 10s by dropping down Year 1/Year 2 |  Count on using a 100 square using counters. Drop down to add 10. |  Find missing numbers from a 100 square by using knowledge and pre-existing skills. Drop down, count on and use pictorial representations. | $17 + 11$ Drop down and count on in jumps. |

| | | | | |
|--|---|--|---|--|
| Stage 3: Mental methods evolving into written methods | Regrouping to make 10. EYFS/Year 1 |  $6 + 5 = 11$  <div>Start with the bigger number and use the smaller number to make 10.</div> |  $3 + 9 =$ Use pictures or a number line. Regroup or partition the smaller number to make 10.  | $7 + 4 = 11$ If I am at seven, how many more do I need to make 10. How many more do I add on now? |
| | Adding three single digits Year 2 | $4 + 7 + 6 = 17$ Put 4 and 6 together to make 10. Add on 7.  Following on from making 10, make 10 with 2 of the digits (if possible) then add on the third digit. |  <div>Add together three groups of objects. Draw a picture to recombine the groups to make 10.</div> | $4 + 7 + 6 = 10 + 7 = 17$ Combine the two numbers that make 10 and then add on the remainder. |

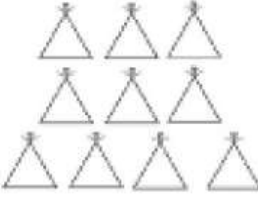

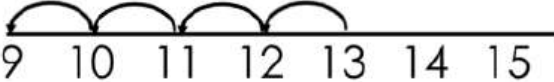

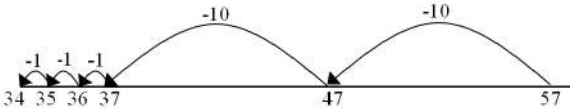

| | | | |
|--|--|---|---|
| <p>Column method- no regrouping</p> <p>Year 2 Year 3</p> | <p>24 + 15=</p> <p>Add together the ones first then add the tens. Use the Base 10 blocks first before moving onto place value counters.</p>  | <p>After practically using the base 10 blocks and place value counters, children can draw the counters to help them to solve additions.</p>  | <p><u>Calculations</u></p> $21 + 42 =$ $\begin{array}{r} 21 \\ + 42 \\ \hline \end{array}$ |
| <p>Partitioning to add numbers mentally</p> <p>Year 2 Year 3</p> | <p>Use Base 10 to represent numbers in their partitioned stages</p>  <p>Then, add the tens together, then the ones.</p> | <p>Children move on to draw base 10 blocks and place value counters</p>  | $\begin{array}{r} 25 \\ + 43 \\ \hline 88 \end{array}$ <p>8 (5 + 3) 60 (20 + 40) <u>68</u></p> |
| <p>Stage 4: Column Method</p> | <p>Column method- regrouping</p> <p>Year 3 Year 4</p> | <p>Make both numbers on a place value grid.</p>  <p>146 + 527</p> <p>Add up the ones and exchange 10 ones for one 10.</p> | <p>Children can draw a pictorial representation of the columns and place value counters to further support their learning and understanding.</p>  <p>Start by partitioning the numbers before moving on to clearly show the exchange below the addition.</p> <p>As the children move on, introduce decimals with the same number of</p> $\begin{array}{r} 536 \\ + 85 \\ \hline 621 \\ 11 \end{array}$ |

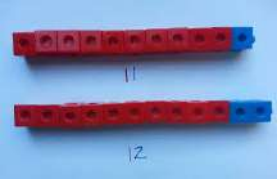

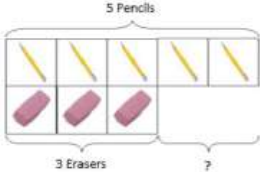

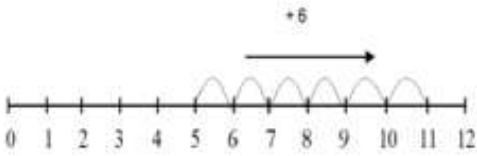

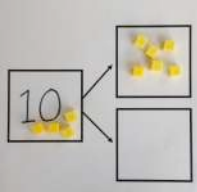

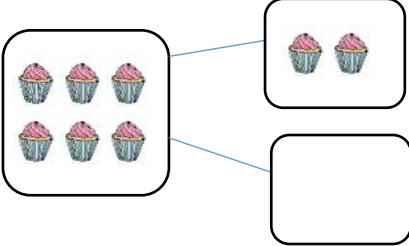

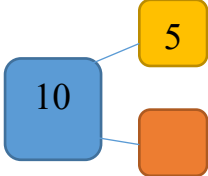

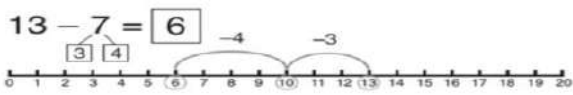

| | | | | | |
|---|---|--|--|--|---|
| | | <div><div>146 + 527</div></div> <p>Add up the rest of the columns, exchanging the 10 counters from one column for the next place value column until every column has been added.</p> <p>This can also be done with Base 10 to help children clearly see that 10 ones equal 1 ten and 10 tens equal 100.</p> <p>As children move on to decimals, money and decimal place value counters can be used to support learning.</p> | | decimal places and different. Money can be used here. | |
| Stage 5: Column addition, moving to decimals and larger numbers. | Column method moving to decimals and larger numbers/multiple numbers. Year 5 Year 6 | As above, use physical representations such as large decimal points on a WB, using a line of children as numbers. | <div><div>7151</div></div> | As with above, show another column with striking decimal points. | <div><div>23.361 9.080 59.770 + 1.300 ----- 93.511 212</div><p>Use and represent 0 as a place holder in step one. Units of measurement come as final steps.</p></div> |

| <p>Add and subtract numbers with up to three digits, using formal written methods of columnar addition and subtraction.</p> <p>Use place value counters to secure conceptual understand (Two-digits then three-digits)</p>  <p>357 - 143</p> <p>↓↓↓ leading to ↓↓↓</p> $\begin{array}{r} 700 + 40 + 1 \\ - 300 + 60 + 7 \\ \hline \end{array}$ $\begin{array}{r} 600 \quad 130 \quad 11 \\ 700 + 40 + 1 \\ - 300 + 60 + 7 \\ \hline 300 + 70 + 4 \end{array}$ $\begin{array}{r} 6 \quad 13 \quad 11 \\ 741 \\ - 367 \\ \hline 374 \end{array}$ <p>↓↓↓ leading to ↓↓↓</p> <p><u>Columnar subtraction</u></p> <p>No exchanges</p> $\begin{array}{r} 536 \\ - 321 \\ \hline 215 \end{array}$ <p>One exchange</p> $\begin{array}{r} 784 \\ - 237 \\ \hline 547 \end{array}$ <p>Two exchanges</p> $\begin{array}{r} 735 \\ - 278 \\ \hline 457 \end{array}$ <p>Including zero</p> $\begin{array}{r} 511 \\ 603 \\ - 247 \\ \hline 356 \end{array}$ | <p>Add and subtract numbers with up to four digits, using the formal written method of columnar addition and subtraction where appropriate.</p> <p><u>Columnar subtraction</u></p> <p>No exchanges</p> $\begin{array}{r} 5837 \\ - 1324 \\ \hline 4513 \end{array}$ <p>One exchange</p> $\begin{array}{r} 61 \\ 4767 \\ - 2392 \\ \hline 2375 \end{array}$ <p>Two exchanges</p> $\begin{array}{r} 641 \\ 7523 \\ - 3732 \\ \hline 3791 \end{array}$ <p>Three exchanges</p> $\begin{array}{r} 511 \\ 5211 \\ - 1536 \\ \hline 4789 \end{array}$ <p>Including zero</p> $\begin{array}{r} 511 \\ 5043 \\ - 4781 \\ \hline 1262 \end{array}$ <p><u>Also include:</u></p> $\begin{array}{r} 41 \\ 1534 \\ - 254 \\ \hline 1280 \end{array}$ $\begin{array}{r} 2141 \\ 3155 \\ - 536 \\ \hline 2619 \end{array}$ <p>Decimal subtraction in the context of money.</p> | <p>Add and subtract numbers with more than four digits, using the formal written methods of columnar addition and subtraction.</p> <p><u>Formal written method</u></p> <p>Various exchanges</p> $\begin{array}{r} 4151 \\ 75365 \\ - 32539 \\ \hline 42826 \end{array}$ <p><u>Also include:</u></p> $\begin{array}{r} 4151 \\ 75366 \\ - 627 \\ \hline 74739 \end{array}$ $\begin{array}{r} 1131 \\ 20439 \\ - 5247 \\ \hline 15192 \end{array}$ <p>Decimal subtraction in the context of money and measures to 3.d.p</p> | <p>Pupil practise addition, subtraction... for larger numbers, using the efficient written methods of columnar addition and subtraction.</p> <p><u>Efficient written method</u></p> <p>Numbers with different decimal places.</p> $327.5 - 62.63$ $\begin{array}{r} 2161 \\ 327.50 \\ - 62.63 \\ \hline 264.87 \end{array}$ $645.27 - 351.8$ $\begin{array}{r} 5141 \\ 645.27 \\ - 351.80 \\ \hline 293.47 \end{array}$ <p>Decimal subtraction in the context of money and measures to 3.d.p</p> |

Progression of Subtraction

| Calculation Stage | Objective and Strategies | Concrete | Pictorial | Abstract |
|--|--|---|--|---|
| Stage 1: Concrete objects and pictorial representations | Taking away ones EYFS/Year 1 | Use physical objects, counters, cubes etc to show how objects can be taken away. <div style="display: flex; align-items: center;">  $6 - 2 = 4$ </div> <div style="display: flex; align-items: center; margin-top: 10px;">   </div> <div style="display: flex; align-items: center; margin-top: 10px;">   </div> | Cross out drawn objects to show what has been taken away. <div style="display: flex; justify-content: space-around; align-items: center;">   </div> <div style="text-align: center; margin-top: 10px;"> $15 - 3 = \boxed{12}$ </div> | $18 - 3 = 15$ $8 - 2 = 6$ |
| | Counting back EYFS/Year 1 Year 2 | <p>Make the larger number in your subtraction. Move the beads along your bead string as you count backwards in ones.</p>  <p style="text-align: center; margin-top: 20px;">$13 - 4$</p> <p>Use counters and move them away from the group as you take them away counting backwards as you go.</p>  | <p>Count back on a number line or number track</p>  <p>Start at the bigger number and count back the smaller number showing the jumps on the number line.</p>  <p>This can progress all the way to counting back using two 2 digit numbers.</p> | <p>Put 13 in your head, count back 4. What number are you at? Use your fingers to help.</p> |

| | | | | |
|---|---|---|--|---|
| <p>Stage 2: Number lines and 100 squares</p> | <p>Find the difference</p> <p>EYFS/Year 1 Year 2</p> | <p>Compare amounts and objects to find the difference.</p>  <p>Use cubes to build towers or make bars to find the difference</p>  <p>Use basic bar models with items to find the difference</p> |  <p>Count on to find the difference.</p> | <p>Hannah has 23 sandwiches, Helen has 15 sandwiches. Find the difference between the number of sandwiches.</p> |
| | <p>Part, Part Whole Model</p> <p>EYFS/Year 1 Year 2</p> | <p>Link to addition-use the part whole model to help explain the inverse between addition and subtraction.</p>  <p>If 10 is the whole and 6 is one of the parts. What is the other part? $10 - 6 =$</p> | <p>Use a pictorial representation of objects to show the part part whole model.</p>  |  <p>Move to using numbers within the part whole model.</p> |
| <p>Stage 3: Linking concrete to abstract to decompose</p> | <p>Make 10</p> <p>EYFS/Year 1 Year 2</p> | <p>$14 - 9 =$</p>  <p>Make 14 on the ten frame. Take away the four first to make 10 and then takeaway one more so you have taken away 5. You are left with the answer of 9.</p> |  <p>Start at 13. Take away 3 to reach 10. Then take away the remaining 4 so you have taken away 7 altogether. You have reached your answer.</p> | <p>$16 - 8 =$</p> <p>How many do we take off to reach the next 10?</p> <p>How many do we have left to take off?</p> |

Column method without regrouping

Year 3

Use Base 10 to make the bigger number then take the smaller number away.

Show how you partition numbers to subtract. Again make the larger number first.

alongside the written calculation to help to show working.

Draw the Base 10 or place value counters

$$47 - 24 = 23$$

$$\begin{array}{r} 40 + 7 \\ - 20 + 4 \\ \hline 20 + 3 \end{array}$$

This will lead to a clear written column subtraction.

$$\begin{array}{r} 32 \\ - 12 \\ \hline 20 \end{array}$$

Stage 4: Compact decomposition, moving to larger numbers and decimals

Column method with regrouping

Year 3
Year 4
Year 5
Year 6

Use Base 10 to start with before moving on to place value counters. Start with one exchange before moving onto subtractions with 2 exchanges. Make the larger number with the place value counters

Start with the ones, can I take away 8 from 4 easily? I need to exchange one of my tens for ten ones.

Draw the counters onto a place value grid and show what you have taken away by

crossing the counters out as well as clearly showing the exchanges you make.

$$836 - 254 = 582$$

$$\begin{array}{r} 800 \quad 30 \quad 6 \\ - 200 \quad 50 \quad 4 \\ \hline 500 \quad 80 \quad 2 \end{array}$$

Children can start their formal written method by partitioning the number into clear place value columns.

$$728 - 582 = 146$$

$$\begin{array}{r} \text{H} \quad \text{T} \quad \text{U} \\ 7 \quad 2 \quad 8 \\ - 5 \quad 8 \quad 2 \\ \hline 1 \quad 4 \quad 6 \end{array}$$

Moving forward the children use a more compact method.

Now I can subtract my ones.

Now look at the tens take away 8 tens easily? I need to exchange one hundred for ten tens.

Now I can take away eight tens and complete my subtraction.

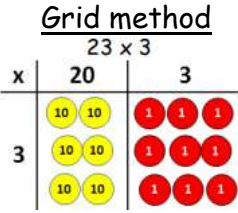

Show children how the concrete method links to the written method alongside your working. Cross out the numbers when exchanging and show where we write our new amount.

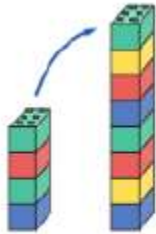

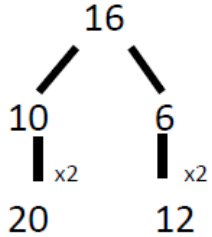

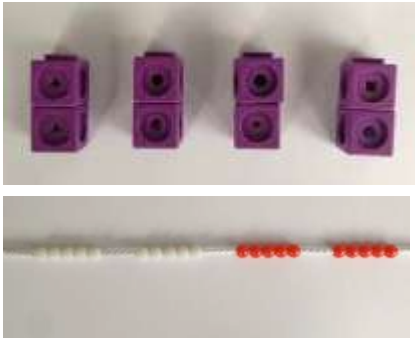

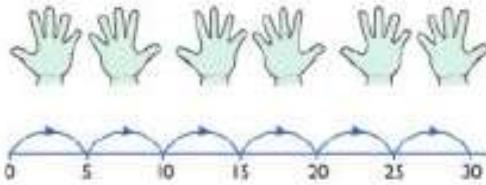

This will lead to an understanding of subtracting any number including decimals.

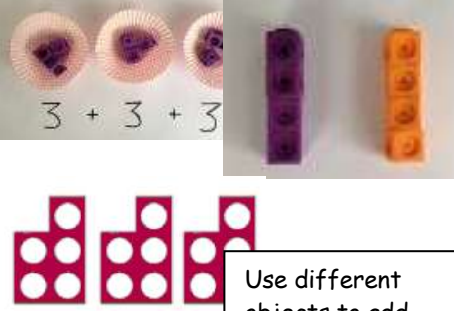

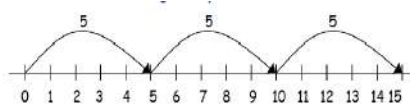

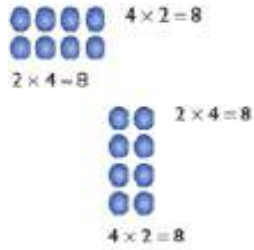

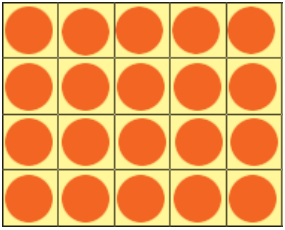

$$\begin{array}{r} 5 \quad 12 \quad 1 \\ 2 \quad \cancel{6} \quad \cancel{3} \quad . \quad 0 \\ - \quad 2 \quad 6 \quad . \quad 5 \\ \hline 2 \quad 3 \quad 6 \quad . \quad 5 \end{array}$$

Written methods of MULTIPLICATION

| Year 3 | Year 4 | Year 5 | Year 6 |
|---|--|---|--|
| <p>Write and calculate mathematical statements for multiplication and division using the multiplication tables that they know, including for two-digit numbers times one-digit.</p> <p><u>Grid method</u></p>  <p>16 × 4</p> $\begin{array}{r} \times 10 \ 6 \\ 4 \ 40 \ 24 \ = 64 \end{array}$ <p>32 × 8</p> $\begin{array}{r} \times 30 \ 2 \\ 8 \ 240 \ 16 \ = 256 \end{array}$ | <p>Multiply two-digit and three-digit numbers by a one-digit number using formal written layout.</p> <p><u>Grid method</u></p> 135×6 $\begin{array}{r} \times 100 \ 30 \ 5 \\ 3 \ 600 \ 180 \ 30 \ = 810 \end{array}$ <p>2 4</p> $\begin{array}{r} \times 3 \\ 1 \ 2 \\ \hline 6 \ 0 \\ \hline 7 \ 2 \end{array}$ <p>↓ ↓ ↓ leading quickly to</p> <p><u>Formal written layout</u></p> $\begin{array}{r} 4 \ 2 \\ \times 3 \\ \hline 1 \ 2 \ 6 \end{array}$ $\begin{array}{r} 3 \ 6 \\ \times 4 \\ \hline 1 \ 4 \ 4 \\ \hline 2 \end{array}$ $\begin{array}{r} 3 \ 1 \ 2 \\ \times 6 \\ \hline 1 \ 8 \ 7 \ 2 \\ \hline 1 \end{array}$ $\begin{array}{r} 2 \ 7 \ 3 \\ \times 7 \\ \hline 1 \ 9 \ 1 \ 1 \\ \hline 5 \ 2 \end{array}$ | <p>Multiply numbers up to 4 digits by a one- or two-digit number using an formal written method, including long multiplication for two-digit numbers.</p> <p><u>Formal written method</u></p> $\begin{array}{r} 2 \ 5 \ 1 \ 3 \\ \times 7 \\ \hline 1 \ 7 \ 5 \ 9 \ 1 \\ \hline 3 \ 2 \end{array}$ $\begin{array}{r} 6 \ 5 \ 7 \ 9 \\ \times 8 \\ \hline 5 \ 2 \ 6 \ 3 \ 2 \\ \hline 4 \ 6 \ 7 \end{array}$ <p><u>Long multiplication method</u></p> $\begin{array}{r} 2 \ 7 \\ \times 3 \ 4 \\ \hline 1 \ 0 \ 8 \\ 8 \ 1 \ 0 \\ \hline 9 \ 1 \ 8 \end{array}$ 27×4 27×30 $\begin{array}{r} 1 \ 2 \ 4 \\ \times 2 \ 6 \\ \hline 7 \ 4 \ 4 \\ 2 \ 4 \ 8 \ 0 \\ \hline 3 \ 2 \ 2 \ 4 \\ \hline 1 \ 1 \end{array}$ $\begin{array}{r} 2 \ 3 \ 7 \ 4 \\ \times 3 \ 2 \\ \hline 4 \ 7 \ 4 \ 8 \\ 7 \ 0 \ 2 \ 2 \ 0 \\ \hline 7 \ 4 \ 9 \ 6 \ 8 \end{array}$ | <p>Multiply numbers up to 4 digits by a two-digit number using the formal written method of long multiplication.</p> <p>Multiply one-digit numbers with up to two decimal places by whole numbers.</p> <p><u>Formal written method</u></p> $\begin{array}{r} 6 \ 0 \ 2 \ 7 \\ \times 3 \ 4 \\ \hline 2 \ 4 \ 1 \ 2 \ 0 \ 8 \\ 1 \ 8 \ 0 \ 8 \ 1 \ 0 \\ \hline 2 \ 0 \ 4 \ 9 \ 1 \ 8 \end{array}$ $\begin{array}{r} 4 \ 3 \ 7 \ 8 \\ \times 7 \ 3 \\ \hline 1 \ 2 \ 3 \ 1 \ 3 \ 4 \\ 2 \ 3 \ 5 \ 0 \ 5 \ 6 \ 4 \ 6 \ 0 \\ \hline 3 \ 1 \ 9 \ 5 \ 9 \ 4 \end{array}$ $\begin{array}{r} 8 \ . \ 7 \\ \times 6 \\ \hline 5 \ 2 \ . \ 2 \\ \hline 4 \end{array}$ $\begin{array}{r} 8 \ . \ 6 \ 8 \\ \times 7 \\ \hline 6 \ 0 \ . \ 7 \ 6 \\ \hline 4 \ 5 \end{array}$ <p><u>Also include:</u></p> $\begin{array}{r} 7 \ 8 \ 4 \ . \ 9 \\ \times 6 \\ \hline 4 \ 7 \ 0 \ 9 \ . \ 4 \\ \hline 5 \ 2 \ 5 \end{array}$ $\begin{array}{r} 4 \ 1 \ . \ 6 \ 8 \\ \times 7 \\ \hline 2 \ 6 \ 1 \ . \ 7 \ 6 \\ \hline 1 \ 4 \end{array}$ <p>Decimal multiplication in the context of money and measures.</p> |

Progression of Multiplication

| Calculation Stage | Objective and Strategies | Concrete | Pictorial | Abstract |
|---|---|--|--|--|
| Stage 1: Concrete objects and pictorial representations | Doubling EYFS/Year 1 | Use practical activities to show how to double a number.  double 4 is 8 $4 \times 2 = 8$ | Draw pictures to show how to double a number. Double 4 is 8  |  Partition a number and then double each part before recombining it back together. Count in multiples of a number aloud. Write sequences with multiples of numbers. 2, 4, 6, 8, 10 5, 10, 15, 20, 25, 30 |
| | Counting multiples EYFS/Year 1 | in  Count in multiples supported by concrete objects in equal groups. |  Use a number line/counting stick pictures to continue support in counting in multiples. | |

| | | | | |
|---|---|---|--|--|
| <p>Stage 2: Arrays</p> <p>Stage 3: Repeated addition linking to practical apparatus</p> | <p>Repeated addition</p> <p>Year 1 Year 2</p> |  <p>Use different objects to add equal groups.</p> | <p>There are 3 plates. Each plate has 2 star biscuits on. How many biscuits are there?</p>  <p>2 add 2 add 2 equals 6</p>  <p>5 + 5 + 5 = 15</p> | <p>Write addition sentences to describe objects and pictures.</p>  <p>2 + 2 + 2 + 2 + 2 = 10</p> |
| | <p>Arrays- showing commutative multiplication</p> <p>Year 1 Year 2 Year 3</p> | <p>Create arrays using counters/ cubes to show multiplication sentences.</p>   | <p>Draw arrays in different rotations to find commutative multiplication sentences. Link arrays to area of rectangles.</p>   | <p>Use an array to write multiplication sentences and reinforce repeated addition.</p>  <p>5 + 5 + 5 = 15 3 + 3 + 3 + 3 + 3 = 15</p> <p>5 x 3 = 15 3 x 5 = 15</p> |

| | | | | |
|------------------------------|---|--|--|---|
| Stage 4: Number partitioning | Year 3 | <p>Use Base 10 to show a number partitioned into tens and ones.</p> <div><div>T</div><div>O</div><div><div><div></div><div></div><div></div><div></div><div></div><div></div><div></div><div></div><div></div><div></div></div><div><div></div><div></div><div></div><div></div><div></div><div></div><div></div><div></div><div></div><div></div></div></div></div> <p>Multiple each piece using known tables.</p> | <p>Partition numbers into 10s and 1s and multiply each part before recombining.</p> <div><div>27 X 3</div><div>27</div><div><div>20</div><div>7</div><div>60</div><div>21</div><div>81</div></div></div> | <p>Use clear, well-formed number sentences and line up column values</p> <div><div>27 X 3</div><div>20 X 3 = 60</div><div>7 X 3 = 21</div><div>60+21 = 81</div></div> |
| | <div><div>Grid Method</div><div>Year 3</div><div>Year 4</div></div> | <p>Show the link with arrays to first introduce the grid method.</p> <div><div><div>x</div><div>10</div><div>3</div><div>4</div><div><div><div></div><div></div><div></div><div></div><div></div><div></div><div></div><div></div><div></div><div></div></div><div><div></div><div></div><div></div><div></div><div></div><div></div><div></div><div></div><div></div><div></div></div></div></div><div>4 rows of 10</div><div>4 rows of 3</div></div> <p>Move on to using Base 10 to move towards a more compact method.</p> <div><div><div>x</div><div>T</div><div>U</div><div><div></div><div></div><div></div><div></div></div><div><div></div><div></div><div></div><div></div></div></div></div> <div>4 rows of 13</div> <p>Move on to place value counters to show how we are finding groups of a number. We are multiplying by 4 so we need 4 rows.</p> <div><div><div>100</div><div>10</div><div>1</div><div><div></div><div></div><div></div><div></div><div></div><div></div><div></div><div></div><div></div><div></div></div></div></div> <div>Calculations</div> <div>4 x 126</div> <p>Fill each row with 126.</p> | <p>Children can represent the work they have done with place value counters in a way that they understand.</p> <p>They can draw the counters, using colours to show different amounts or just use circles in the different columns to show their thinking as shown below.</p> <div><div>24 X 3 = 72</div><div><div>X</div><div>20</div><div>4</div><div>3</div><div><div><div></div><div></div><div></div><div></div><div></div><div></div><div></div><div></div><div></div><div></div></div><div><div></div><div></div><div></div><div></div><div></div><div></div><div></div><div></div><div></div><div></div></div></div></div></div> | <p>Start with multiplying by one digit numbers and showing the clear addition alongside the grid.</p> <div><div><div>X</div><div>30</div><div>5</div><div>7</div><div>210</div><div>35</div></div></div> <div>210 + 35 = 245</div> <p>Moving forward, multiply by a 2 digit number showing the different rows within the grid method.</p> |

Add up each column, starting with the ones making any exchanges needed.

Then you have your answer.

| | | |
|----|-----|----|
| | 10 | 8 |
| 10 | 100 | 80 |
| 3 | 30 | 24 |

| X | 1000 | 300 | 40 | 2 |
|----|-------|------|-----|----|
| 10 | 10000 | 3000 | 400 | 20 |
| 8 | 8000 | 2400 | 320 | 16 |

Stage 5: Compact method 2x1 and 3x1

Column multiplication

Year 3
Year 4
Year 5
Year 6

Children can continue to be supported by place value counters at the stage of multiplication.

Stage 6: Compact method 2x2 and 3x2 and beyond

It is important at this stage that they always multiply the ones first and note down their answer followed by the tens which they note below.

Bar modelling can support solving problems multiplication formal written

and number lines learners when alongside the methods.

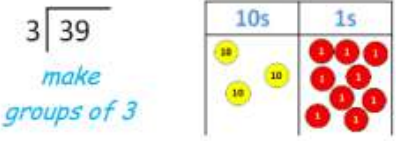

With long multiplication, remind the children about lining up their numbers clearly in columns.

If it helps, children can write out what they are solving next to their answer.

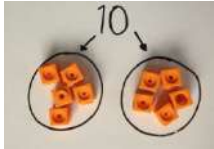

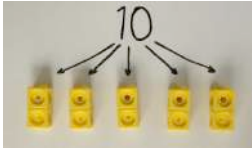

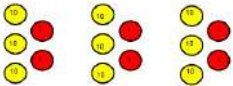

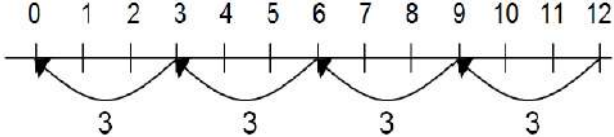

$$\begin{array}{r} 32 \\ \times 24 \\ \hline 64 \quad (4 \times 2) \\ 120 \quad (4 \times 30) \\ \hline 768 \end{array}$$

$$\begin{array}{r} 1342 \\ \times 18 \\ \hline 13420 \\ 10736 \\ \hline 24156 \end{array}$$

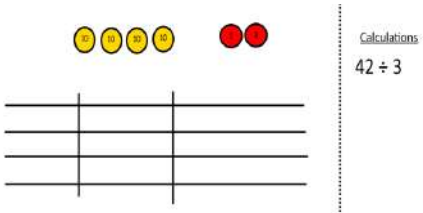

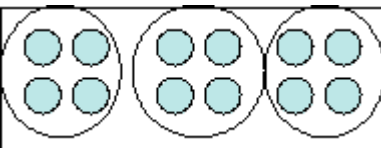

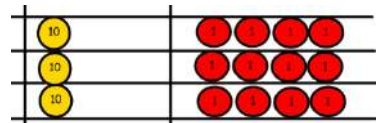

Written method of DIVISION

| Year 3 | Year 4 | Year 5 | Year 6 |
|--|--|---|---|
| <p>Pupils develop reliable written methods for.. division, starting with calculations of two-digit numbers and progressing to the formal written methods of short division.</p> <p><u>Partitioning</u></p> $39 \div 3 \quad \frac{10 + 3}{3 \mid 30 + 9} = 13$ $64 \div 4 \quad \frac{10 + 6}{4 \mid 40 + 24} = 16$ $72 \div 3 \quad \frac{20 + 4}{3 \mid 60 + 12} = 24$ | <p>Pupils practise to become fluent in the formal written method of ... short division with exact answers</p> <p><u>Partitioning</u></p> $119 \div 7 \quad \frac{10 + 7}{3 \mid 70 + 49} = 17$ $216 \div 9 \quad \frac{20 + 4}{3 \mid 180 + 36} = 24$ <p><u>Short division</u></p>  $3 \overline{) 39}$ $3 \overline{) 63} \quad 6 \overline{) 84}$ | <p>Divide numbers up to 4 digits by a one-digit number using the formal written method of sort division and interpret remainders appropriately for the context.</p> <p><u>Short division</u></p> $3 \overline{) 21} \quad 6 \overline{) 14}$ $3 \overline{) 6712} \quad 6 \overline{) 12318}$ $7 \overline{) 1621} \quad 8 \overline{) 2732}$ $6 \overline{) 1416} \quad 7 \overline{) 1345}$ <p>There are 421 children here today.
